

About the Book

The Chief Information Security Officer's (CISO) Toolkit is a collection of books and software for the Chief Information Security Officer (CISO) of a substantial enterprise. Information Security Awareness Basics provides a standardized basic security awareness program for deployment across an enterprise in booklet form.

- **For small enterprises:** the awareness booklet can be deployed by purchasing copies for all workers and briefing them on differences between the booklet and internal rules.
- **For larger enterprises:** the awareness booklet can be customized to your needs and deployed across the enterprise, complete with your logos, custom questions and exams for enterprise feedback, and adding or removing elements of the program as desired.
- **For the largest enterprises:** The awareness booklet can be licensed for internal-only on-line use and configured as a set of training modules within existing automated workflow systems.

Fred Cohen & Associates also licenses the use of this material along with customizations and provides complete awareness programs.

About the Author

Fred Cohen is best known as the inventor of computer virus defense techniques, the principal investigator whose team defined the information assurance problem as it relates to critical infrastructure protection today, as a seminal researcher in the use of deception for information protection, and as a top flight information protection consultant. But his work on information protection extends far beyond these areas. He has written hundreds of books and papers, spoken at conferences all over the world, taught courses in universities and short courses to corporate audiences for many years, and regularly participates in many different professional activities. With more than 25 years of experience and a global reputation for integrity, accuracy, and innovation, Fred Cohen is widely considered one of the world's leading authorities in information protection.
